Movement Rehab

WhatsApp Appointment Automation Workflow

1. Welcome Message

Bot: ■ Welcome to **Movement Rehab**
Your trusted physiotherapy & rehabilitation center.

Options:
■ Book Clinic Appointment | ■ Online Consultation
■ Home Consultation | ■ Our Services | ■ Clinic Location

2. Book Clinic Appointment

Step	Patient Journey
1	Select service: Physiotherapy, Sports Rehabilitation, Pain Management, Posture & Mobility, Post-Surgery Rehabilitation, or Gene
2	Enter full name and mobile number.
3	Select or describe the main concern/injury.
4	Select preferred appointment date.
5	System checks availability and shows available time slots.
6	Patient confirms the selected slot.
7	Appointment is created and confirmation is sent on WhatsApp.

3. Online Consultation

Bot: ■ Get professional physiotherapy guidance from the comfort of your home.

Collect: **Full Name** → **Phone Number** → **Concern/Injury** → **Preferred Date** → **Preferred Time**.
The system checks available online consultation slots, confirms the booking, and automatically sends the online consultation details/link through WhatsApp.

4. Home Consultation

Bot: ■ Our physiotherapist can visit you at your home for personalized rehabilitation.

Collect: **Full Name** → **Phone Number** → **Concern** → **Complete Address/Location** → **Preferred Date**.
The system checks home-visit availability, confirms the appointment, and sends the booking details through WhatsApp.

5. Appointment Confirmation

Bot: ■ **Appointment Confirmed!**

■ Name: Rahul Sharma
■ Service: Physiotherapy
■ Date: 21 September 2026
■ Time: 5:30 PM
■ Mode: Clinic / Online / Home Visit

Please arrive 10 minutes before your clinic appointment. We look forward to seeing you! ■

6. Automated Reminders

Timing	WhatsApp Automation
24 hours before	Reminder with appointment date, time, mode/location, and Confirm / Reschedule / Cancel options.
2 hours before	Short reminder that the appointment is scheduled for today.

7. Reschedule / Cancellation

Reschedule: Patient selects a new date → system checks availability → new slot is confirmed → updated WhatsApp confirmation is sent.

Cancel: Patient confirms cancellation → appointment is cancelled → patient receives a cancellation confirmation and can choose “Book New Appointment”.

8. Recommended System Flow

WhatsApp → Welcome → **Choose Appointment Type** → Clinic / Online / Home → Patient Details → Date → Availability Check → Time Slot → Confirmation → Appointment Database/Calendar → WhatsApp Confirmation → 24-Hour Reminder → 2-Hour Reminder

9. Suggested Technology Setup

WhatsApp Business API + **Node.js/Express** + **MongoDB or Supabase** + **Google Calendar/Appointment Management** + automated WhatsApp reminders. An admin dashboard can be added for staff to view appointments, block slots, reschedule bookings, and manage availability.
